Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Non-Final Rejection

Election/Restriction

1. Applicant's election without traverse of Species A, Fig 1-3, and claims 9-14, 16-20, is acknowledged.

Claim 15 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 9-14, 16-20, as best understood, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims, elected for prosecution, are confusing and are not clear because claimed limitations, (claim 9, a connecting surface which defines an access opening to a door interior; claim 12, a seal that seals off the vehicle door with respect to a vehicle chassis and is arranged on a door side of said connecting surface between said first stiffening element and said second stiffening element; claim 14, a lock component wall provided on one of aid first stiffening element and said second stiffening element and a free wall end provided on the other of aid first stiffening element and said second stiffening element, wherein said free wall end is sealingly supported against said one of said first stiffening and said second stiffening element to encapsulate a door lock), are not shown in the figures and/or lacks support in the specification and therefore fails to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These limitations must be shown or the feature(s) canceled from the claim(s). Applicant is requested to go through the application and ensure that the claimed matter has been described in the specification and shown in the drawing in such a way as to convey to one skilled in the art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 9-11, 13-14, 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishikawa et al. (6,474,721).

Regarding claims 9-11, 13-14, 16-20, Nishikawa et al. (6,474,721) discloses in Fig. 1-23 the invention as claimed to include a lid-shaped outer panel element D2; a hinge (functional part) 1; an internal stiffening pan-shaped structure includes a first stiffening element p for supporting said outer panel element and a second stiffening element D1 for supporting said functional part; a window frame D3; and an inner panel element.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishikawa et al. (6,474,721) in view of Koa et al. (6,412,852).

Regarding claims 12-13, Nishikawa et al. (6,474,721) discloses the invention as claimed.

However, Nishikawa et al. (6,474,721) does not disclose a connecting bolt.

Koa et al. (6,412,852) discloses in Fig 1-8 a connecting bolt 25.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the invention, as disclosed by Nishikawa et al. (6,474,721), to include a connecting bolt, as disclosed by Koa et al. (6,412,852), to connect two stiffening elements and improve the strength of the door.

Conclusion

6. The prior art made of record in attached Notice of Reference Cited (PTO-892) and not relied upon is considered pertinent to applicant's disclosure. This art of record shows various features similar to the applicant's invention.

7. Any inquiry concerning this communication or earlier communications should be directed to Primary Examiner Kiran B. Patel whose telephone number is 703-305-0254.
